

1991 Cantera HP-200

- DR 203 - HP200

Compact, Versatile, and Powerful

The Cantera HP-200 is one of the most unique and versatile helicopter portable geotechnical drill rigs within Geotech's fleet. The HP 200's auto SPT hammer and top head design allows it to be proficient in mud rotary, air rotary and coring. Along with an adaptable modular drill design, the HP 200 is capable of drilling in the most difficult terrains.

Depth Capabilities:

Air Rotary (cased): 150m (500')

Air Rotary (open hole): 210m (700')

Mud Rotary: 120m (400')

HQ: 120m (400')

NQ: 180m (600')

Rig Features:

- Head stroke: 4.2m (14')
- SPT capabilities
- Outrigger system for additional stability
- Multiple rotation motors for each specific drilling application
- Double clamp breakout system, reducing the need for pipe wrench usage
- Power: 176 hp
- Heaviest component - 1360 lbs
