

HELI RIG

HP-200

Compact, Versatile and Powerful

The Canterra HP-200 is one of the most unique and versatile helicopter portable geotechnical drill rigs within Geotech's fleet. The HP-200's auto SPT hammer and top head design allows it to be proficient in mud rotary, air rotary and coring. Along with an adaptable modular drill design, the HP-200 is capable of drilling in the most difficult terrains.

Depth Capabilities:

Air Rotary (cased): 61 m (200')

HQ: 244 m (800')

Air Rotary (open hole): 305 m (1,000')

NQ: 365 m (1,200')

Mud Rotary: 305 m (1,000')

Rig Features:

- Head stroke: 4.2 m (14')
- SPT capabilities
- Power: 176 hp
- Heaviest component - 1,800 lbs
- Outrigger system for additional stability
- Multiple rotation motors for each specific drilling application
- Double clamp breakout system, reducing the need for pipe wrench usage
