

TRACK RIG

FRASTE MDXL MAX

Versatile, Aggressive, and Adaptable

With a proven track record of excellence the Fraste MDXL Max is one of the most versatile drill rigs of its kind. This drill rig can perform in numerous drilling sectors, including but not limited to: air rotary, reverse circulation, auguring, coring and geotechnical investigation. Its unique drill pipe manipulator and tilt out head system allows for safe pipe handling, eliminating potential back strains for field workers. The Fraste MDXL Max is also equipped with remote operation control, allowing safe mobilization; even in the toughest of conditions.

Depth Capabilities:

Air Rotary (cased): 100 m (330')

Air Rotary (open hole): 850 m (2,780')

Mud Rotary: 165 m (550')

PQ: 455 m (1,500')

HQ: 695 m (2,290')

NQ: 850 m (2,780')

BQ: 1,095 m (3,590')

Dimensions:

Width: 1.98 m (6.5')

Length: 3.7 m (12')

Height: 4.6 m (15')

Rig Features:

- Max Stroke: 4.5 m (14.8')
- Maximum Clamping Diameter: 300 mm
- Rubber Tracks
- Unique tilt up top head system
- Swing arm adjustable control panel for tight access drilling
- Drill pipe manipulator feature for automatic drill pipe loading
- Remote operation radio control for safe and secure mobilization
- Rod manipulator capable of holding over 152 meters of NWJ rod
- Double clamp breakout system, reducing the need for pipe wrench usage
