

# IF YOUR SCOPE DOES NOT CHANGE, NEITHER WILL YOUR DRILLING COSTS

## **Looking to eliminate surprises for drilling costs on your projects in the Lower Mainland and Okanagan?**

Once we agree to a scope of work, Geotech will prepare a fixed price to give you complete surety on the costs to complete the drilling on your project. Send us your project specifics to confirm your scope qualifies for our fixed price drilling option.

Geotech will remain flexible, should you need to adjust, expand, or reduce the scope if conditions change when we are at site; if scope changes are required, Geotech can simply revert to time and material pricing for the entire, or just the revised portion.

If your project goes as planned and the scope does not change, neither will your drilling price.

## **Does your project require CPT data as well?**

Let's add that onto the project. With a variety of tools and options available to get the data you need, let us demonstrate our full service capabilities. Our partners at Gregg Drilling and Testing Canada, will join us on the project with their unparalleled CPT tooling.
